

SUBJECT INDEX

BUILDING INFORMATION-SOCIETIES IN THE DEVELOPING COUNTRIES TO MEET SOCIO-ECONOMIC CHALLENGES OF THE 21ST CENTURY: SOME POLICIES AND STRATEGIES

Understanding the Socio-Economic Debate, **29**; Challenges Ahead, **32**; Triad for Development, **33**; Policies and Strategies to Move Forward, **35**; Policy-Considerations for Developing Countries, **36**; Technology Support, **38**; Some Considerations and Guidelines for National Strategies on ICTs, **39**; Conclusions, **42**; Bibliography and Further Reading, **43**.

COLLABORATING FOR SUCCESS

Introduction, **45**; Getting Started, **45**; Finding the Money, **48**; Getting the Work Done, **49**; Publishing, Authorship and Credit, **50**; After Success, **52**; Conclusions, **52**.

HEALTH AND ENVIRONMENTAL RISKS FROM POOR WATER-SUPPLY AND SANITATION IN DEVELOPING COUNTRIES - A CASE STUDY OF N.W.F.P., PAKISTAN

Introduction, **137**; Geographic Area of the Study, **141**; Research Approach and Methodology, **143**; Water-Supply and Sanitation Challenges, **144**; Water-Supply and Sanitation Institutions, **147**; Current Water-Supply and Sanitation Initiatives and Future Plans, **148**; Conclusions, **150**; References, **152**.

IMPORTANCE OF S&T POLICIES AND STRATEGIES FOR DEVELOPING COUNTRIES

Introduction, **89**; Rationale of S&T Policy, **90**; Importance & Objectives of S&T Policy: *Promotion of Basic Research, Improving Scientific and Technological Infrastructure, Encouraging Research and Innovation, Promoting International S&T Cooperation, Establishing a Regime of Intellectual Property Rights (IPR)*, **92**; Strategic Planning and Implementation: *S&T Governance, Investment in Science and Technology, Optimal Utilization of Existing Infrastructure and Competence, Strengthening of S&T Infrastructure in Academic Institutions, Funding Mechanisms for Basic Research, Development of Human-Resource, Transfer, Diffusion and Development of Technology, Promotion of Innovation, Industrial and Scientific R&D, Indigenous Resources and Traditional Knowledge, Technologies for Mitigation and Management of Natural Hazards & Disasters, Generation and Management of Intellectual Property, Public Awareness of Science and Technology, International Cooperation in Science and Technology, Fiscal Measures, Monitoring*, **95**; Conclusions, **103**; Bibliography, **104**.

MOBILIZING SCIENCE & TECHNOLOGY FOR SUSTAINABLE DEVELOPMENT: THE ROLE OF S&T POLICIES

Introduction, **1**; Realizing the Inevitability of Science & Technology for Sustainable

Development, **3**; Contributions of Science and Technology as Important Tools for Sustainable Development, **4**; The Role of S&T Policies in Mobilizing S&T Resources for Sustainable Development, **5**; Some Policy-Directions for S&T Development and Principle Guidelines, **7**; Premise for S&T Policy-Framework, **9**; Agenda 21, Millennium Development Goals (MDGS) and Science & Technology, **11**; Role of Governments, **13**; Conclusions, **15**; References/Bibliography, **16**.

POLICIES AND STRATEGIES FOR SUCCESSFUL PROJECT-MANAGEMENT ATTRIBUTED TO SOCIO-ECONOMIC UPLIFT OF THE DEVELOPING COUNTRIES

Introduction, **67**; Pre-Requisites for Project Development, **69**; Understanding the Policies, Objectives and Strategies, **70**; Programmes, Projects and Sustainable Socio-Economic Development, **71**; Policies and Strategies Relevant to the Developing Countries, **75**; Urgencies, Priorities and their Adoption, **77**; Successful Project-Management through International Cooperation, **79**; The Way Forward, **81**; Conclusions, **84**; References and Further Reading, **87**.

S&T POLICY AND INNOVATION LEADS TO SOCIO-ECONOMIC DEVELOPMENT AND KNOWLEDGE-ECONOMY: CASE STUDIES OF U.S.A., TURKEY AND S. KOREA

Invention, Innovation and Commercialization, **105**; Commercialization of Knowledge-Its Future, **106**; Science, Technology and Innovation (STI), **107**; Innovation and Development, **109**; Re-Conceptualizing the Link Between Science, Technology, Innovation (STI) and Development, **110**; Increased Funding for Science, Technology and Innovation (STI), **111**; The Essential Role of University-Industry Linkage for the South, **111**; Understanding the Role of Politics and Policy in Developing Countries, **113**; Need to Promote Interdisciplinary and Collaborative Research in the Developing World, **113**; Policy on Science, Technology and Innovation in Developed Countries - A Case Study of United States of America (USA): *American Innovation-Model for Knowledge-Commercialization, The Role of American Government in Promoting Innovation, The American Universities' Function in Building, Entrepreneurship, The Multi-faceted Role of American Industry, Successful Knowledge-Creation and Commercialization by America*, **115**; Policy on Science, Technology and Innovation in Developing Countries - A Case Study of Turkey: *The National Innovation System of Turkey, Government and Legislative Bodies, Private-Sector Organizations and Promotion of Entrepreneurship, Knowledge Institutes (R&D and Educational Bodies), Industrial-Research Centers and Innovation-Intermediaries, Financial System for Turkish National Innovation System (NIS), Conclusions: Successful National Innovation System (NIS) of Turkey*, **121**; Case Study of South Korea: *Introduction, South Korea's National Innovation System (KNIS), Innovation System and Knowledge Cluster, R&D Expenditure, The Flow of R&D Expenditure, Total Number of R&D Personnel, Technological Achievements, Establishment of Government Research Institutes, National R&D Program, The First Five-Year S&T Principal Plan, The Long-term Vision for Science, Technology and Innovation Development, Conclusion: Successful National Innovation System (NIS) of South Korea*, **126**; Discussion, **133**;

References, **134**; Bibliography, **134**.

SCIENCE AND TECHNOLOGY FOR ACHIEVING THE MILLENNIUM DEVELOPMENT GOALS

Development, **53**; Knowledge, **54**; Science and Technology, **55**; Millennium Development Goals (MDGs), **55**; The Role of Science & Technology in Achieving MDGs: *Eradicating Extreme Poverty and Hunger, Achieving Universal Primary Education, Improving Health Status, Ensuring Environmental Sustainability*, **57**; Competencies/Capacities, **62**; National Developmental Strategies, **63**; References, **64**.

SCIENTIFIC CULTURE: A PRE-REQUISITE FOR SUSTAINABLE DEVELOPMENT

Galileo Versus the Professors, **19**; Present Predicament, **20**; Beginnings of Science, **20**; Respect of Knowledge in Islam, **21**; Contributions of Muslims to Science, **21**; End of Islamic Renaissance in Science, **22**; Plight of Science and Science-Education in Pakistan: *Hold of the Feudal and Clergy, Plight of Education, A Living Curriculum, System of Examinations, Political Will, Education and Scientific Culture*, **23**; Commissions and Committees on Education in Pakistan, **24**; Iqbal's Vision, **25**; Conclusions, **26**; References, **27**.
